

Foot Care for People with Diabetes

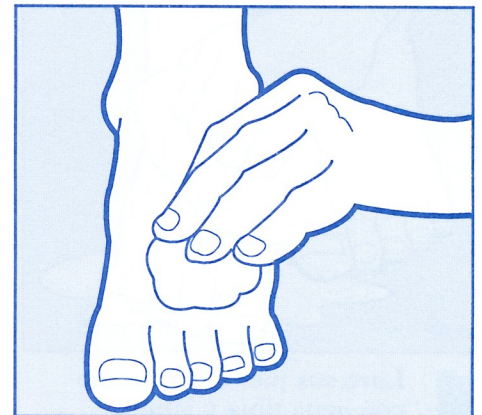

People with diabetes have to take special care of their feet.

1 Wash your feet daily with lukewarm water and soap.

2 Dry your feet well, especially between the toes.

3 Keep the skin supple with a moisturizing lotion, but do not apply it between the toes.

4 Check your feet for blisters, cuts or sores. Tell your doctor if you find something wrong.

5 Use emery board to shape toenails even with ends of your toes.

6 Change daily into clean, soft socks or stockings, not too big or too small.

7 Keep your feet warm and dry. Preferably wear special padded socks and always wear shoes that fit well.

8 Never walk barefoot indoors or outdoors.

9 Examine your shoes every day for cracks, pebbles, nails or anything that could hurt your feet.

**Take good care of your feet - and use them.
A brisk walk every day stimulates the circulation.**
